

## CHIEF GUEST

### Mr B K Handique

Hon'ble Minister of State for Chemicals & Fertilizers and  
Parliamentary Affairs, Government of India

## PROGRAMME

11.30 A.M. ONWARDS (Please take your seats by 11.15 a.m.)

- Welcome Address by Mr Rupchand Lohia, Chairman
- Reading of Messages by Mr Nemish Sayani, Vice Chairman
- Distribution of Export Awards / Certificates of Merit for the year 2004-05 and 2005-06
- Presentation of Citation to Mr V Ramakrishnan, Ex-Chairman
- Keynote Address by Mr B K Handique,  
Honourable Minister of State for Chemicals & Fertilizers and  
Parliamentary Affairs, Government of India
- Vote of Thanks by Mr G Sudhakar, Regional Chairman,  
Southern Region
- Lunch

**MESSAGE**

I am happy to know that the Plastics Export Promotion Council is organizing its Export Award function in Mumbai on 28 October 2006.

It is indeed heartening to know that the Council has been rendering useful services to the exporters and is serving as a catalyst in promoting export. I am pleased to know that India's export turnover from this segment is on the verge of crossing US \$ 3 billion mark and is poised to touch greater heights in the near future.

I congratulate all the award winners who have done commendable work during the last two years and convey my best wishes to the Plastics Export Promotion Council in its endeavours.

**MESSAGE**

I am very happy to learn that the Plastics Export Promotion Council is holding its Export Award Function in Mumbai on 28<sup>th</sup> October 2006. Plastics are new technology material which will find greater use in everyday life. I am very happy to learn that the total export turnover in this area is growing faster than expected and is about to cross US\$ 3 billion. Manufacturing is an area where the Government is keen that further investments should be made and India should register even faster growth. I am sure that the Plastic Export Promotion Council along with all its members will redouble their efforts in this direction.

### Message

I am happy to learn that The Plastics Export Promotion Council (Plexconcil) is organizing its Export Award Function in Mumbai on 28<sup>th</sup> October, 2006.

Export from the Plastics sector have registered a healthy growth of over 35% in the last financial year, and is expected to cross US Dollars 3 billion in the current fiscal. This growth rate must be sustained in order to become India a major player in the global market, and I wish the Council and its members all success towards this end.

I congratulate all the Export Award winners and extend my best wishes to Plexconcil and its members on this occasion.

**MESSAGE**

Date : 6<sup>th</sup> Oct.06

I am happy to know that The Plastics Export Promotion Council will be organizing its Export Award Function on 28<sup>th</sup> October 2006 in Mumbai.

The Plastic and the Plastic products have now become an unavoidable part of human life. It became a partner of our country's economic growth and hence the member of your Council also playing an important role in export of plastics. It is heartening to note that the export turnover of the Council is on the verge of crossing the three billion U.S. Dollar mark. I am confident that award winner will be proved to be a source of inspiration for other members. I congratulate all the winners of Export Award.

I wish the Export Award Function all success.

**MESSAGE**

I wish to complement the Plastic Export Promotion Council (PLEXCONCIL) on the export award function being held on 28<sup>th</sup> October, 2006 at Mumbai.

Plastics plays an important role in the economic development by providing numerous products by supplementing and substituting conventional material. The design flexibility and energy savings have helped in development of innovative products. It is heartening to know that India's export of plastics and articles thereof is reaching the US \$ 3 billion mark by this year.

Usage of plastic products have great potential in the future. The advantages India has in the technical capabilities should be leveraged in promoting exports.

Export awards are an important event to encourage the members to sustain the growth of export.

I wish to compliment all the Members and particularly the award winners and hope they will scale new heights in future performance.

#### MESSAGE

I am happy to learn that the Plastics Export Promotion Council (Plexconcil) is organizing its Export Award Function in Mumbai on 28<sup>th</sup> October, 2006.

It is encouraging to note that the exports from the plastics sector have registered a growth of over 35% in the last financial year and now are valued a US Dollars 2.63 billion.

I am sure that the Council will leave no stone unturned in contributing to the achievement of the national goal of doubling India's exports by 2008-09 as set out by the Government. I wish success to the Plexconcil and its members in achieving even higher growth in exports.

I also congratulate all award winners for their performance.

#### MESSAGE

I am happy to learn that the Plastics Export Promotion Council (Plexconcil) is organizing its Export Award Function to honour the top exporters for the year 2004-05 and 2005-06 in Mumbai on 28<sup>th</sup> October, 2006.

Plexconcil is a leading export promotion council of the country and caters to over 2100 members. It is encouraging to note that exports from the plastics sector are growing faster than expected and have achieved an overall export turnover of US Dollars 2.63 billion. I am also pleased to note that exports from this sector are expected to cross US Dollars 3 billion in the current financial year.

I wish all success to Plexconcil in their efforts to promote exports in a highly competitive international market and extend my heartiest congratulations to the award winners with a hope that those, who have missed, this opportunity will make intensive efforts to ensure the distinction in the coming years.

**MESSAGE**

I am happy to know that The Plastic Export Promotion Council is organizing the Export Award Function in Mumbai on 28<sup>th</sup> October, 2006.

Plastics Industry plays an important role in preserving the natural resources by providing alternate energy efficient material. I am happy to note that plastic export contributed about US \$ 1.9 billion exports during 2004-05 and likely to cross three billion mark during 2006-07. The sustained economic growth of around 8% will help boost the applications of plastics. The upgraded technical skills and improved quality standards of the Indian companies will help in capturing the larger size of the global market in the future years.

Distribution of Export Awards is an important event to encourage the performance of the different sectors of the Industry and increase the growth in export performance.

I wish all the Members and particularly the award winners all success and hope they will scale new heights in future performance.

  
(B.P. Pandey)

WELCOME ADDRESS  
**Mr R C Lohia**  
Chairman

Friends

I am delighted to be amongst you all here today on the occasion of our Export Award Function – the first one that I am addressing after having taken over as the Chairman of the Council last year. It gives me great pleasure to welcome you all to this prestigious event where the Top Performers in the export arena from the Indian plastic industry will be honoured. I must not forget the top exporters from the Human Hair and its products sector who will also be honoured.

At the outset, friends, I would like to welcome you all to this function today and hope that this event will be a motivating factor to both the export award winners and other fellow exporters to scale greater heights by bringing in more and more foreign exchange through exports. I would like to accord a special welcome to Mr B K Handique the Honourable Minister in the Ministry of Chemicals & Fertilizers, Government of India who has found time out of his otherwise busy schedule and is amidst us here today to honour the export Award winners. His presence here is very much indicative of his own and his Ministry's conviction to accord a high priority to plastic exports. All of you must be aware that our products are under the jurisdiction of the Department of Chemicals and Petrochemicals which is under his Ministry.

I would like to welcome all the dignitaries from the Government and other export agencies who have always extended us their best co-operation and support in our endeavour to boost exports from the Indian plastic industry. I must also accord a special welcome to friends from the media who have always been disseminating our messages, programmes and achievements to the masses. I would also like to accord a special welcome to all the Export Award Winners and take this opportunity to heartily congratulate them on their achievements.

Friends, on the export front we are doing extremely well. In 2005-2006 we achieved an export of 2633 million US Dollars registering a growth of about 35%. which is extremely good indeed. We had set ourselves a

target of 1500 million US Dollars and we have far exceeded the target. However, while we have an excellent export figure before us, I must add that the exports of plastics raw material alone constituted about 55% of our exports.

Friends, you will recall that last year we celebrated our Golden Jubilee in Mumbai and the Executive Director of Reliance Industries was the Guest of Honour. He categorically mentioned in his address that while he was happy to note that his company figured in the top exporters of Plexconcil, he was saddened to point out that the plastic processing is losing an opportunity of 300 million dollars through value addition on the raw material that they were exporting. Therefore, friends, we must act fast and see that the exports of value added plastic items takes a front seat to actually give a further quantum boost to exports from the Indian plastic industry. I must also add that the growth that we have registered in processed plastic exports is over 45% which clearly goes to show that we are indeed capable of boosting exports in processed plastics to a much larger extent.

For the year 2006-2007, we have set ourselves a target of 3450 million US dollars and would like to sustain a growth rate of at least 25% consistently in each year in the future. You will recall that just a few years ago we were talking about crossing the one-billion US Dollar mark in plastic exports. We are crossing the 3-billion dollar mark much faster than what we had expected. We need to do a lot more to gain a respectable share in the world market and I look forward to all of us working together towards this end.

Friends, let me just run you through a few figures which will highlight where we stand when it comes to exports. In the year 2005, the imports of about 68 countries of Chapter 39 items and writing instruments amounted to about 375 billion US Dollars. 177 billion dollars out of this total value accounted for processed plastics. The actual figures will be much higher than these since these figures denote the imports of 68 countries only.

Let us take five Asian countries namely China, South Korea, Thailand, Malaysia and our own country India. In the year 2005 China exported 10.34 million Metric Tonnes (MMT) of plastics; South Korea exported 9.50 MMT of plastics; Thailand 4.06 MMT; Malaysia 2.95 MMT and India 1.61 MMT of plastics. The percentage of processed plastics exported was highest by China standing at about 81%. South Korea was the lowest standing at about 11%. The percentages of processed

plastics of Malaysia, India and Thailand stood at 36%, 26% and 20% respectively. Even though percentage wise we look better off in exports when it comes to processed plastics, smaller countries like Thailand and Malaysia are far ahead of us in exports of both raw materials and processed plastics in absolute terms.

China is the largest trading partner for the Indian plastic industry who imports mainly raw materials from us and is a stiff competitor to most of us round the world for processed plastics. We still have a long way to go. When we talk about exports, China always figures in our discussions. While we are just hovering around the export figure of 3-billion dollars, China's exports of Chapter 39 items alone for the year 2005 was over 38 billion US Dollars. I have just mentioned about a few Asian Tigers who are much smaller than us in size, are far ahead of us in exports. We must take lessons from these countries and see how best we can come up to a respectable level on the international front.

We must also take lessons from a few sectors in our plastic industry itself. The polyester film sector, the woven sack sector, writing instruments and the plastic raw material sector particularly Polypropylene and possibly PET Chips sector are indeed doing very well in the field of exports. These are the sectors that have exceeded the 1% market share in exports in the calendar year 2005. I must add that an item like tooth brushes has also almost reached the 1% mark. When these sectors have reached these levels, why not the others? One of the key factors that have contributed to their success is the economies of scale in production. Besides these, aggressive marketing and improving productivity play a key role in export success.

With these details in front of you, the challenge before us is as to how we go about getting a respectable share in the international markets. As far as the Government is concerned, liberalization is definitely on a fast track. I still can recall the good old days when such meetings and events used to focus on the export-import policy. However, today we really do not have much to discuss on this subject other than a few procedural hassles. We in the Council have always been propagating that we have to now be more aggressive on the marketing front.

The Government's well-conceived Market Access Initiative or the MAI is an excellent vehicle for us to gain better access in the short run. You will recall that our project under this initiative was among one of the earlier approvals granted by the Department of Commerce. This project was aimed at tapping the over 5-billion US Dollar market for plastic consumer

items in the USA which in the first phase involved a Market Study. Based on the Market Study the Council embarked upon the second phase of actually implementing the recommendations in the study which involved setting up of display centres, warehouses, participation in trade fares and publicity campaigns.

Unfortunately, the second phase never took off due to the poor response from the members. Subsequently, we did introspection as to why this happened. One of the reasons was possibly that the project was too ambitious in terms of the integrated approach in trying to set up display centres, warehouses and other activities at the same time. It was felt that this could be tackled in stages. The other important reason was the inexperience of both the Council and the members in embarking on such projects. The inexperience of the Council was in terms of selling the idea of direct marketing in target countries to its members. As far as the exporting members were concerned, their mindset was tuned to thinking of exports in terms of selling their ware to bulk importers in target countries. In fact, one of the recommendations of the study to withstand competition was to resort to direct marketing.

We are in the process of recasting the project and submitting the same to the Government for their approval. I request all members to lend their expertise to the Council in making such projects successful for gaining better market access. In fact in the Work Group for Petrochemicals constituted by the Department of Chemicals & Petrochemicals where our Council is also represented, we have suggested that in the short run we must resort to direct marketing and use the MAI launched by the Government. Participation in trade fairs, sponsoring delegations to target countries and other export promotion activities will receive our due attention for achieving results in the short run.

In the long run we must head at an export-led growth where the Special Economic Zones have a very important role to play. We must promote Special Economic Zones for plastic products. Foreign investors must be invited to develop state-of-the-art SEZs. Units in such SEZs must be open to Indian entrepreneurs as well as foreign firms wishing to set up manufacturing base in India. An exhaustive promotion must be worked out for promoting such projects in India which will end up in processing plastics for the export markets.

I think it is high time we all sit across to devise a road map as to how we can go about gaining a respectable share in the world markets. I have already expressed a few thoughts in this direction which need to

be expanded upon and translated into an action plan which ultimately has to be executed. I will only be too glad to accept volunteers who could join me in devising such a plan.

Before I could end I would like to inform you we were invited to China last month by the Organising Committee of the 6<sup>th</sup> China Plastic Exhibition and Conference to participate at the International Business Forum on the 24<sup>th</sup> September 2006. The fair was not a very big one. However, there were a lot of consumer items that were on display. I was impressed by the variety of the consumer items produced by one single factory, which perhaps our own factories here do not have. The prices were incredibly low. There were a lot of injection and blow moulding machines also on display at highly competitive prices.

The topic for the International Business Forum was "International Business Alliances in a Fiercely Competitive Environment". We must appreciate that such a topic was coming out from our Chinese counterparts whose hospitality was commendable. The presentation made by us was appreciated by one and all and is published in the brochure that has been circulated to you. In fact, we made a suggestion that an apex body comprising of Trade Promotion Organisations or TPOs like ours must be put in place to forge international business alliances. In fact, International Business Alliances must begin at the TPO level so that they can be percolated down to the membership levels for mutual benefits. This suggestion was also well-taken so much so that the very next day in a follow-up meeting comprising of delegations from India, USA and the host country China, an association called the GLOBAL UNITED PLASTICS ASSOCIATION or the GUPA was put in place. The Council will be representing India in the GUPA. The objectives of the GUPA will be to enhance the global plastics consumption through exchange of information on various issues like exhibitions; environment; international trade etc. The next meeting of the GUPA is likely to be held in Kolkata in November this year to coincide with the Indplas

Friends, I would not like to take much of your time and would like to end by requesting all of you to join hands by working together with a common end of enhancing exports from the plastics sector.

THANK YOU

\*\*\*\*\*

**PLEXCONCIL's Presentation at the  
INTERNATIONAL BUSINESS FORUM**

Taizhou, China – 23<sup>rd</sup> September 2006

On the occasion of

**6<sup>th</sup> CHINA PLASTICS EXHIBITION & CONFERENCE**

Presented by: Mr R C Lohia, Chairman

**Friends**

At the outset, I must compliment the organizers of the International Business Forum and the China Plastics Exhibition & Conference for conceiving the topic of "International Business Alliances in a Fiercely Competitive Global Economy". In fact, conceiving this topic from our Chinese counterparts deserves more kudos given the excellent growth in its economy over the past few years which we believe is indeed the result of an export-led growth. Countries like ours must take lessons from China and this topic deserves a lot of brain-storming and broad-basing our mindsets if all of us have to grow in the future to come.

Before we go into the details of projecting our views on this very pertinent topic, we would first like to introduce The Plastics Export Promotion Council and also briefly describe the Indian plastic industry.

The Plastics Export Promotion Council or Plexconcil as is popularly known, is a non-profit body under the Department of Commerce, Government of India. This body was established in the year 1955 as a registering body for exporters from the Indian plastic industry. Our Council was set up during the time when we used to operate in a controlled economy during which time our role was very different. From 1955 to date we have been exposed to different economic environment and from the year 1992 we effectively transitioned from a controlled economy to a market oriented economy. Our Council has been effectively adapting itself to the changing economic scenarios and effectively playing the role of a good facilitator to exports from the Indian plastic industry. In fact, right from the time our Council was established we have been effectively promoting exports by sponsoring delegations to the overseas, conducting market surveys, participating in trade fairs & conferences and carrying out programmes as per the needs of the exporting community. On the domestic front, we act as an effective interface between the members and the Government and other export agencies. We conduct seminars, open houses etc for the benefit of members. Our Council has about 2000 exporting members manufacturing and exporting a wide spectrum of plastic items that largely include plastic raw materials; packaging materials and other plastic moulded and extruded goods both for industrial and consumer use.

Our exports are slightly short of the three billion US Dollar mark per annum which we expect to cross very soon. India's total exports in 2005 was about 99.65 billion US Dollars out of which plastics (Chapter 39 items) accounted for 2.22 billion US Dollars which will be much more if we consider the plastic items which are outside Chapter 39 classification. While the United States is the largest trading partner (with Indian exports to USA being 16.51 billion US Dollars) when it comes to the overall exports from India. But when we speak of Chapter 39 plastic items, China is the largest trading partner with India exporting 3.39 billion US Dollars. The major plastic items imported by China are plastic raw materials.

To briefly describe the status of the Indian plastic industry - the Indian plastic process industry comprises of about 30,000 plastic processors ably supported by a plastic raw material sector and a machinery and mold and dies sector. There are about 15 major plastic raw material producers producing about 4.7 million metric tonnes of plastic raw materials. The consumption of plastic raw materials is about 4.6 million metric tonnes which is expected to cross 12.5 million metric tonnes by the year 2011-2012.

Coming to the topic of International Business Alliances – it is certainly a need of the emerging fiercely competitive global economy. A buyer-seller relationship is the most popular and easiest form of an international business alliance. If an exporter from an exporting country develops a business relationship with an importer from an importing country an international business alliance is formed. In a competitive environment, one has to go beyond the buyer-seller relationship. The competition factor between various business firms, whether it is within their own country or between their counterparts in other countries, is generally hampered by the mindset of the organizations with apprehensions that their business secrets may be revealed. As such, there is a tendency to keep away from any sort of interaction between such organizations. We are saying this from our own experience when we sponsored delegations to some countries when we were openly told that since they foresee competition they would not like to meet us.

The need for broad-basing international business alliances will be better appreciated if the world as a whole is viewed both as a manufacturing base or sourcing hub as well as a marketplace. In an environment like this, Trade Promotion Organisations like ours, have a major role to play in forging International Business Alliances – a need of a fiercely competitive global economy. In the present scenario with the emergence of the World Trade Organisation (WTO) and liberalization in most countries taking the front seat, broad-basing such alliances becomes all the more important.

Time has come for us to look into the broader aspect of developing relationships between competitors, much beyond the buyer-seller relationships that have existed from time immemorial, which can result in mutually beneficial relationships.

We are an Export Promotion Council with the prime objective of promoting exports from the Indian plastic industry. Today, all countries are giving a thrust to exports and competing with one another in the international arena. Deriving the analogy from various industry associations within one's own country which are formed by competitors, we must forge alliances between trade promotions organizations across the globe. Competitors do get together and share their experiences and also form alliances by using the core strengths of each other.

We in Plexconcil are open to form alliances with our counterpart organizations. The objectives of such alliances can be laid down. A few objectives (not really exhaustive) that come to my mind are exchange of information on matters like technology, market needs, capacities, databases and many more that could be beneficial to members of the TPOs joining hands to form an alliance. Such exchanges could be facilitated through seminars or conferences jointly organised to analyse the strengths and weaknesses of members of the TPOs based on which alliances between the individual members may be facilitated towards mutual benefits. The role of trade promotion bodies is more effective since it also facilitates in bringing together firms, businessmen and professionals even with diverse cultural backgrounds speaking different languages.

International Trade Fairs like the China-PEC which are generally coupled with conferences are effective vehicles to forge business alliances among firms across the globe. Such events are either supported or organised by Trade Promotion Organisations. Today we are all meeting here on the occasion of the China Plastic Exhibition & Conference which is also effectively facilitating interactions that we are talking about. This is an excellent forum to pave the way for business alliances between stakeholders coming from diverse cultural backgrounds under one roof. Cultural and language gaps are also bridged in many cases by even having the choicest cuisines and availability of interpreters.

In India, we have the Plastindia Foundation, which many of you must have heard of and is well known for the triennial international trade fair that it organizes in India namely the PLASTINDIA. The last such fair concluded in February this year and was also well attended. Plastindia Foundation is an apex body comprising of seven founder members, which also includes us, and was primarily conceived after identifying a need by all the Founders to establish an international trade fair of international repute in India. Today most of the Founder Members, who are spread across India, are also organizing international trade fairs at various parts of India. Today we hear of the INDPLAS in Kolkata; PLEXPO in Ahmedabad; PLASTIVISION in Mumbai and many more. These events, I am sure will promote international business alliances.

We in our Council are open to any sort of promotion that will facilitate business alliances. In fact, during the last Plastindia Exhibition we had

invited delegations from a few countries and it was our first experience. After this experience, we are convinced that alliances developed with counterpart organizations, even with similar objectives which must not be construed as competition, is a must if we have to successfully promote trade by and large. International business alliances are indeed a vehicle towards this end. Developing an alliance with counterpart bodies with clear cut objectives laid down can indeed go a long way in achieving our goals. This very experience of ours, where we tried inviting delegations from some select countries, could have been done more effectively if we had come to an understanding with similar trade promotion bodies. I must, at this juncture, compliment the organizers of the China-PEC and the International Business Forum of putting in efforts to bring in a trade delegation from India by approaching us. I do hope that this will culminate into an alliance that will foster trade promotion by building effective alliances in the future to come.

In fact, going by these developments, we must consider forming an Apex Body at a global level comprising of Trade Promotion Bodies related to the plastic sector. Other than plastic trade promotion bodies, we could also rope in associations of say plastic houseware, writing instruments, sacks and bags, plastic machinery, moulds and dies and many more related to the plastic industry. We could possibly draw out a set of objectives based on which we could operate and promote trade and business alliances. Such a forum could provide a platform for the members of the respective trade promotion bodies under the umbrella of the apex body for interactions with each other. Conferences like these could be organised to coincide with important plastic and related events in each country. In fact, we are happy to note that an Asian Plastics Forum has already been formed and we had the pleasure of attending one of its meetings in India. As a corollary, Regional Apex bodies could also be initiated and all such regional bodies could form the apex body.

Another important aspect of International Business Alliances is the emergence of the World Trade Organisations – while many opportunities have been thrown open to all of us there are a lot of threats that we are exposed to. A couple of important ones are the anti-dumping and countervailing duties that arise out of dumping and subsidies as defined under the agreement. Such threats can also be minimized through international alliances between trade promotion bodies round the globe and minimize trade disputes.

As far as our Council is concerned, we do hereby reiterate that we are open to forming alliances for mutual benefits. We are indeed open to form alliances with even export promotion bodies in other countries to compliment each others efforts since we believe that there could be cases where you are able to offer items to our country that we are not capable of and vice versa. Such an alliance can facilitate servicing each others members visiting each others countries in terms of coordinating meetings and arranging for other related

services. Conferences could be organised where members can interact with each other. All such activities can be effectively carried out by preserving any confidential business information and disseminating those of mutual interests.

India, having a diverse cultural backgrounds within its own geographical coverage, has a lot to offer. Each state within India has its own schemes to attract investments in industry both from within and outside India. India is also heading towards an export-led growth and the scheme of SPECIAL ECONOMIC ZONES (which are essentially Free Trade Zones) is being actively promoted. Even private investors are allowed to set up such zones for which a policy has been laid down by the Government. We in the Council are willing to offer our facilitating services in terms of guiding businessmen who would like to come and set shop in India, which also offers a large domestic demand.

To conclude, International business alliances are the need of a fiercely competitive global economy where the core strengths of the parties involved are used towards mutual benefits in business. The Trade Promotion Organisations have a lead role to play. Such alliances are best facilitated by their forming alliances with counterpart organizations across the globe. This will result in bringing businessmen with different cultural backgrounds together. The members of the Trade promotion organizations forming the alliance will be serviced by the other counterpart organizations in the alliance. The alliances will last if they indeed culminate in fruitful relationships developed over a period of time. Formation of an Apex Body comprising of Trade Promotion Organisations in plastics and related sectors must be considered. Such an apex body could also be formed by regional apex bodies like the Asian Plastics Forum. The prime objective of such an apex body will be to foster International Business Alliances among members of the organizations comprising the apex body. This will also facilitate minimizing trade disputes.

We in our Council are open to forming such alliances and willing to offer our time towards such an end.

We would once again like to thank the organizers for giving us this opportunity and we compliment them at their initiative of organizing this International Business Forum and the topic itself is proof enough of their having taken the initiative to forge such alliances.

THANK YOU

\*\*\*\*\*

Citation presented to:  
**Mr V Ramakrishnan**  
 Chairman – 2001 - 2003

Mr V Ramakrishnan, born on 19th April 1939, a product of the University of Madras from where he graduated in science and acquired his degree in Mechanical Engineering, commenced his association with the Council as a Member of the Committee of Administration in the year 1991.

A thorough professional, Mr Ramakrishnan acquired expertise in Marketing through his long years of association with the Indian plastic industry. He began his career in 1965 by joining the marketing team of Chemicals & Plastics India Limited a leading manufacturer of PVC Resins. Mr Ramakrishnan, after holding various responsible positions, rose to become the General Manager Sales at their Head Office in Chennai in the year 1978.

In the year 1980, Mr Ramakrishnan joined the Samsons Group of Companies as its President Marketing. In 1985 he initiated exports of PVC Leathercloth and formulated an export strategy for export of cushion vinyl flooring to Russia for the first time from India. He also undertook a market survey for export of leathercloth and cushion vinyl flooring to Europe and successfully entered this market for the first time in 1989. During the course of his assignment, he also acquired expertise in participation at international trade fairs due to their repeated participation in DOMOTEX in Hannover, Germany. He was subsequently also instrumental in developing markets for these products in other countries like Australia, New Zealand, Thailand, the Middle East and African regions.

Mr Ramakrishnan or Ramki as he is fondly called, a widely travelled personality, lent his rich knowledge and experience acquired through his various assignments in the plastic industry, to export promotion when he got himself actively involved with the Council's activities from

the time he was elected to its Committee of Administration in the year 1991. A decade of association with the Council's affairs made him rise to the coveted position of the Chairman of the Council in the year 2001.

Mr Ramakrishnan's association with the Council as its Chairman witnessed the completion of an excellent Market Survey under the Market Access Initiative of the Government involving the tapping of the over 5-billion US Dollar market in the United States of America for plastic consumer items. His active involvement in this study was highly encouraging.

The Council will cherish its association with Mr Ramakrishnan, a professional manager who lent his experience, expertise and wisdom to the Council in its endeavour to promote the exports of plastic items from the Indian plastic industry.

In recognition of his excellent contributions and selfless service of building the plastic industry and its exports, the Council honours Mr V Ramakrishnan with this citation at the hands of MR B K HANDIQUE, Honourable Minister of State for Chemicals & Fertilizers and Parliamentary Affairs, Government of India on this twenty eighth day of October 2006 in Mumbai.
