

Collaborative R&D – Why does it matter more now?

R&D today is most intrinsic to the growth of any industry. And when it comes to R&D, external collaboration comes with undeniable merits. While a single firm's R&D resources are generally limited to a specific field or product, external partner collaboration, chiefly the Academia, promotes innovation by giving access to a vast pool of global talent, knowledge, and expertise. Despite contrasting fundamental objectives, Collaborative R&D goes a long way in building a common ground for success and upliftment of industries at large.

Witness what leading Principal Scientist at NCL, Dr. Samir Chikkali, and eminent industrialist, Mr. Vikram Bhadauria, ALOK Masterbatches have to say about this unique pairing.

Topics & Speakers

- Affordable Technologies & the unexplored realm between the Jugaad and Exotic - Mr. Vikram Bhadauria, MD, ALOK Masterbatches
