## <u>Subject: Regarding Inputs Sought on Anti-Dumping Investigations by Brazil Against Indian</u> Products.

We wish to inform you about the recent developments concerning the growing number of trade remedy actions initiated by Brazil—specifically Anti-Dumping (AD) and Countervailing Duty (CVD) measures targeting Indian exports.

- 1. As of July 2025, six active trade remedy measures are in force against Indian products including polyester, PET films/resins, bicycle tires, and grinding media. Additionally, three new AD investigations have been initiated, covering hot-rolled stainless steel and agricultural tyres. A detailed list of current and terminated measures is attached.
- 2. According to Brazil's Department of Trade Defence (DECOM), trade remedy petitions rose by 165.9% in 2025 (117 compared to 44 last year), indicating a shift towards stronger protection of domestic industry. This trend aligns with previous policies under President Lula. Currently, 43 investigations are underway, with 24 targeting China.
- 3. During the Hon'ble Prime Minister Shri Narendra Modi's visit to Brazil in July 2025, both sides reaffirmed their commitment to strengthening trade ties and addressing non-tariff barriers
- 4. India and Brazil operate a Trade Monitoring Mechanism (TMM), under which six meetings have been held since 2008. The 7th TMM is proposed for 7 October 2025 to discuss pending trade issues.

In this regard, members are requested to provide inputs for the following:

- Details of the impact of the imposed duties on your exports to Brazil.
- · Potential implications of the ongoing anti-dumping investigations on your future exports.
- · Likely implications of ongoing investigations on future trade

Your inputs will enable a coordinated response during the upcoming 7th India–Brazil TMM meeting.

Please share your inputs to the undersigned at <a href="mailto:bharti@plexconcil.org">bharti@plexconcil.org</a>; <a href="mailto:shilpa@plexconcil.org">shilpa@plexconcil.org</a>;
