Export growth in the moulded & extruded goods category was driven by higher shipments to countries like United Arab Emirates and United States, while plastic sheet, film, plates etc category benefited from higher sales to Malaysia and Sierra Leone.

Optical items category received a boost on account of increased export to Russia and United Arab Emirates. Likewise, export of packaging materials benefited from higher shipments to United States and Bangladesh.

The negative export growth in plastic raw materials category was a bit concerning as this particular segment had experienced strong growth in the last year. Exports of plastic raw materials in April 2019 were lower on account of decline in sales to North East Asia (particularly China), Latin America & Caribbean (Peru), and South Asia (Bangladesh).

Human hair segment witnessed a decline in exports due to lower sales to key destinations including China and Myanmar. The human hair export segment has been struggling for quite some time now and their problems have already been submitted to the Department of Commerce for remedial measures.

PLASTICS EXPORT, BY REGION

India's plastics export in April 2019 did well in Commonwealth of Independent States (+77.2% year-on-year), Middle East (+14.0%), and North America (+6.1%), but the export growth was overshadowed by decline in shipments to Latin America & Caribbean (-36.8%), North-East Asia (-22.6%), South Asia (-14.5%), European Union (-4.7%), Africa (-2.1%), and ASEAN + 2 (-1.2%).
